HOW FIREMASTER® evacU8® D200E WORKS

- Compact, space efficient casing encloses vertical rolling assembly
- High temperature fabric rolling curtain withstanding 978 °C (1792 °F)
- Flexible curtain remains retracted and 'invisible' until activated
- Unique, compact pressure guide retention system holds curtain in place and stops blow out under extreme pressure caused by fire conditions
- Heavy duty bottom bar and pressure guides keep curtain in place
- The FireMaster® evacU8® D200E is a critical component of the building's passive redundant fire and life safety system

FIREMASTER® evacU8® D200E ADVANTAGES

- Neat, compact, 'invisible' housings, much smaller and lighter than traditional steel shutters
- Neat, compact pressure guide retention system much smaller than traditional steel shutters
- Can be fixed directly to lightweight flexible constructions unlike steel shutters
- Oversize Certification for widths and drops
- Unique 'Total Gravity Fail Safe' descent with auto reset after clearing of alarm system
- Compact, unobtrusive, remotely located Controls, synchronised with building's fire and life safety system
- VarioSpeed™ drive system and controls ensure the curtain operates safely with controlled descent, ascent and 'Total Gravity Fail Safe' descent
- 24vDC safe, low voltage motor operators
- Listed and labelled by ITS (Intertek Testing Services)
