For more information, please contact your Belimo Representative or order any brochures you need by fax.

## Fax to: BELIMO (address overleaf)

Please send us product brochures on the following damper actuators:

□ LM... □ NM... □ SM... □ AM... □ GM... □ AF... □ Electrical accessories

Please send also information on:

- □ Motorized fire and smoke dampers
- □ Variable air-volume control (VAV-Control)

□ Please call us back

## Note

## Using BELIMO damper actuators

The actuators listed in this catalogue are intended for the operation of air dampers in HVAC systems.

## **Torque requirements**

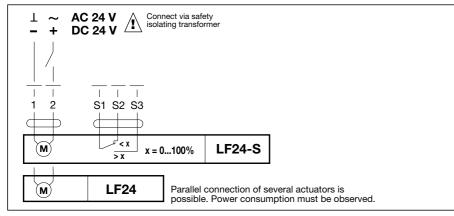

When calculating the torque required to operate dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, mounting and air flow conditions.

## LF24, LF24-S Spring return actuators 4 Nm

#### Wiring diagram

Technical data	LF24, LF24-S			
Nominal voltage	AC 24 V 50/60 Hz, DC 24 V			
Nominal voltage range	AC 19.228.8 V, DC 21.628.8 V			
For wire sizing	7 VA (Imax 5.8 A @ 5 ms)			
Power consumption – motoring – holding	5 W 2.5 W			
Connecting cable	- motor         1 m long, 2 x 0.75 mm²           - auxiliary switch (LF24-S)         1 m long, 3 x 0.75 mm²			
Auxiliary switch (LF24-S) – Switching point	1 x SPDT 6 (1.5) A, AC 250 V □ adjustable 0100% <⊄			
Direction of rotation	selected by mounting L/R			
Torque	<ul> <li>motor</li> <li>min. 4 Nm (at rated voltage)</li> <li>spring return</li> <li>min. 4 Nm</li> </ul>			
Angle of rotation	max. 95° (adjustable 37100%			
Running time	– motor 4075 s  (04 Nm) – spring return  ≈ 20 s @ -2050 °C /  max. 60 s @ -30 °C			
Sound power level	motor max. 50 dB (A), spring $\approx$ 62 dB (A)			
Service life	min. 60 000 operations			
Position indication	mechanical			
Protection class	(safety extra-low voltage)			
Degree of protection	IP 54			
Ambient temp. range Non-operating temp. Humidity test	−30+50 °C −40+80 °C to EN 60335-1			
EMC Low Voltage Directive	CE according to 89/336/EEC, 92/31/EEC, 93/68/EEC CE according to 73/23/EEC			
Maintenance	maintenance-free			
Weight	1400 g			

### Dampers up to approx. 0.8 m<sup>2</sup>

## Open/Close actuator (AC/DC 24 V)

## Control by single-pole contact

#### Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

#### Mode of operation

The LF... actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

## **Product features**

**Simple direct mounting** on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

Mechanical angle of rotation limiting adjustable with built-in stop.

#### High functional reliability

w0108712

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

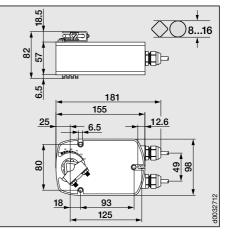

**Flexible signalling** 0...100% *⊲*, with adjustable auxiliary switch (LF24-S only).

Adjusting the auxiliary switch LF24-S, page 6

Mounting accessories, page 11

Mounting instructions, pages 13...15

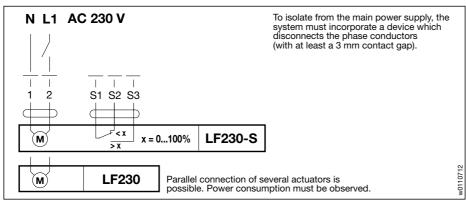

**Important:** Read the notes about the use and torque requirements of the damper actuators on page 3.

#### Wiring diagram

Technical data	LF230, LF230-S			
Nominal voltage	AC 230 V 50/60 Hz			
Nominal voltage range	AC 198264 V

Mounting instructions, pages 13...15

**Important:** Read the notes about the use and torque requirements of the damper actuators on page 3.

## Mounting side R

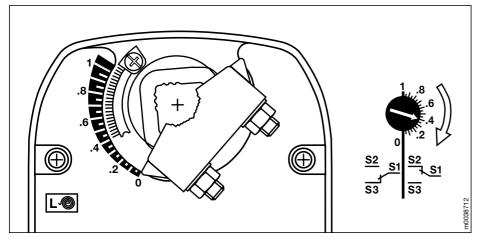

#### Starting point: Actuator in safe position

## Procedure

- Turn the knob of the auxiliary switch until the tip of the arrow is pointing to the required switching position (see left).
   Example: Switching point setting = .4 corresponds to 40% angle of rotation.
- When the actuator runs to the operating position (ccw ), the switch knob will also rotate counter-clockwise (ccw ) and the auxiliary switch will operate as the tip of the arrow passes the scale zero (S1–S3 linked).

# Mounting side L

## Starting point: Actuator in safe position

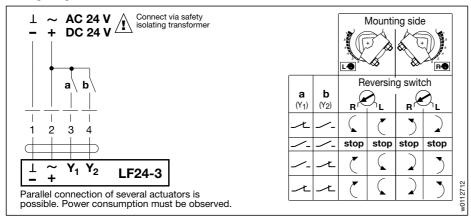

## Procedure

- Turn the knob of the auxiliary switch until the tip of the arrow is pointing to the required switching position (see left).
   Example: Switching point setting = .4 corresponds to 40% angle of rotation.
- When the actuator runs to the operating position (cw ), the switch knob will also rotate clockwise (cw ) and the auxiliary switch will operate as the tip of the arrow passes the scale zero (S1–S3 linked).

### Wiring diagram

#### Dampers up to approx. 0.8 m<sup>2</sup>

## Modulating actuator (AC/DC 24 V)

## **3-point control**

#### Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

#### Mode of operation

The LF24-3 is controlled by a 3-point signal. The actuator runs to the position specified by the control signal while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

## **Product features**

**Simple direct mounting** on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

Mechanical angle of rotation limiting adjustable with built-in stop.

#### High functional reliability

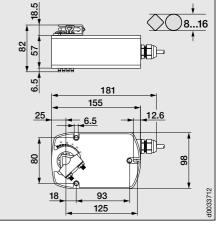

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

### Examples of control modes, page 8

Mounting accessories, page 11

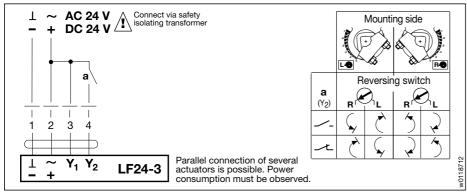

Mounting instructions, pages 13...15

**Important:** Read the notes about the use and torque requirements of the damper actuators on page 3.

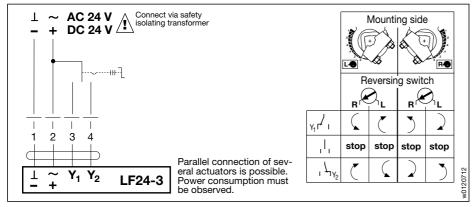

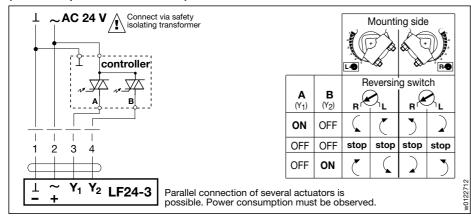

### Open/Close mode with single-wire control

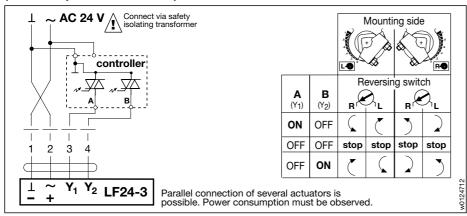

## 3-point control by switch

## 3-point control by controller with triac outputs (reference potential $\sim$ AC 24 V)

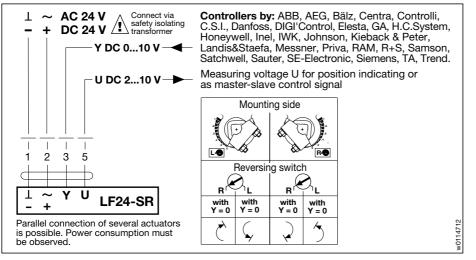

# 3-point control by controller with triac outputs (reference potential L AC 24 V)

### Dampers up to approx. 0.8 m<sup>2</sup>

## Modulating actuator (AC/DC 24 V)

# Control DC 0...10 V and position feedback DC 2...10 V

### Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

#### Mode of operation

The LF24-SR is controlled by a standard DC 0...10 V signal. The actuator runs to the position specified by the control signal while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

### **Product features**

**Simple direct mounting** on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

**Mechanical angle of rotation limiting** adjustable with built-in stop.

#### **High functional reliability**

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

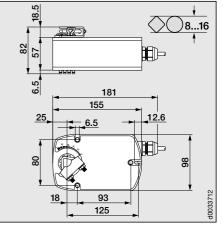

#### **Electrical accessories** (see Doc. 2. Z-1) SG..24 Positioners ZAD24 Digital position indicator

Control/monitoring functions, page 10

Mounting accessories, page 11

Mounting instructions, pages 13...15

**Important:** Read the notes about the use and torque requirements of the damper actuators on page 3.

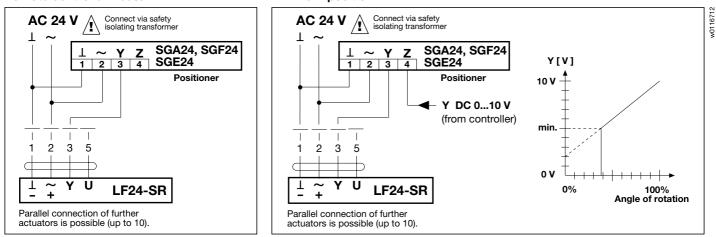

# **Control and monitoring functions LF24-SR**

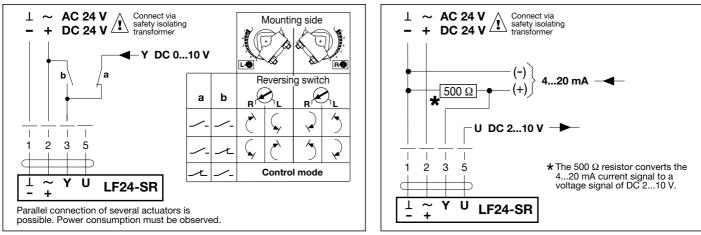

### Remote control 0...100%

Minimum position

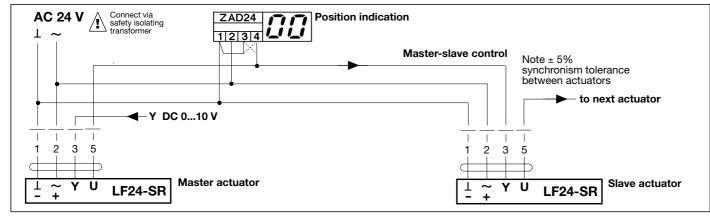

### **Override control**

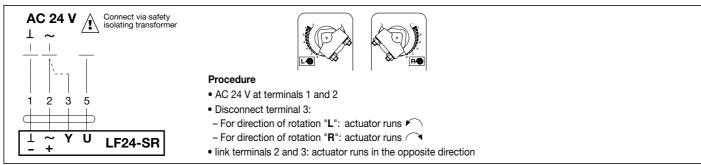

Control by 4...20 mA via external resistor

## Position indication and / or master-slave control (depending on position)

#### **Function monitoring**

## K6-1

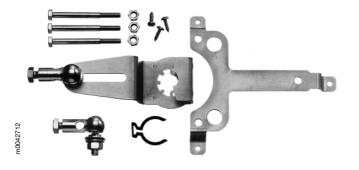

## KH-LF (Application example see page 14)

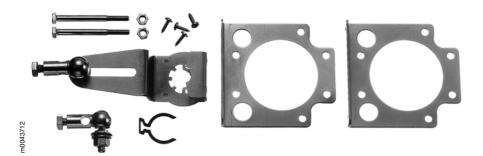

**ZDB-LF** (Application example see page 13)

ZG-LF1 (Application example see page 14, fig. 1)

ZG-LF3 (Application example see page 14, fig. 2)

## Mounting accessories LF...

K6-1

Spindle clamp Suitable for damper spindles 16...20 mm diameter.

ulameter.

The spindle clamp is secured to the actuator by means of a circlip.

## KH-LF

diameter.

Crank arm with slot width 8.2 mm Suitable for damper spindles 8...16 mm

8...16

The crank arm is secured to the actuator by means of a circlip.

### KH-LF1

Crank arm with slot width 8.2 mm Suitable for damper spindles 16...20 mm diameter.

The crank arm is secured to the actuator by means of a circlip.

ZDB-LF Angle of rotation limiting and pointer

The pointer is secured to the actuator by means of a circlip.

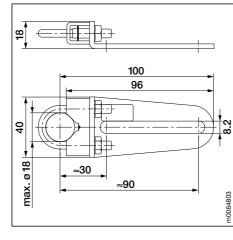

ZG-LF1 Damper linkage kit for flat mounting (with 2 ball joints KG8)

ZG-LF2 Damper linkage kit for flat mounting (without ball joints KG8)

ZG-LF3 Damper linkage kit for side mounting (with 2 ball joints KG8)

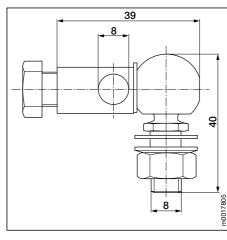

## KH8

Universal crank arm Zinc-plated steel; suitable for damper spindles Ø 10...18 mm or □ 10...14 mm, slot width 8.2 mm.

## KG8

Ball joint Zinc-plated steel; suitable for use with KH8 universal crank arms and round steel rod  $\emptyset$  8 mm.

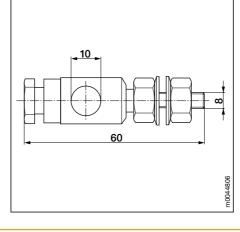

## KG10

KG8

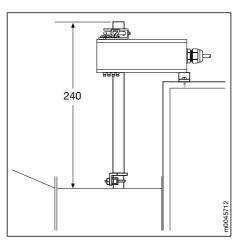

#### KG10 Ball joint

Zinc-plated steel; suitable for use with KH8 universal crank arm and round steel rod Ø 10 mm.

## AV10-18 Universal spindle extension

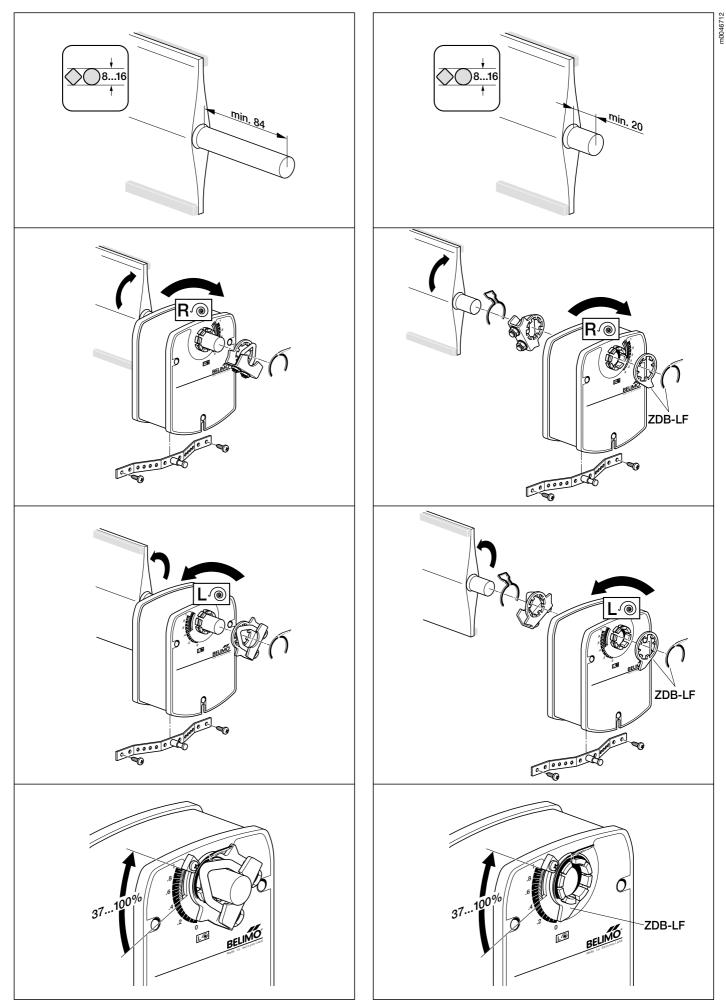

Suitable for damper spindles 10...18 mm diameter.

If an AV10-18 is to be used in conjunction with an LF..., the actuator must be fitted with a K6-1 spindle clamp.

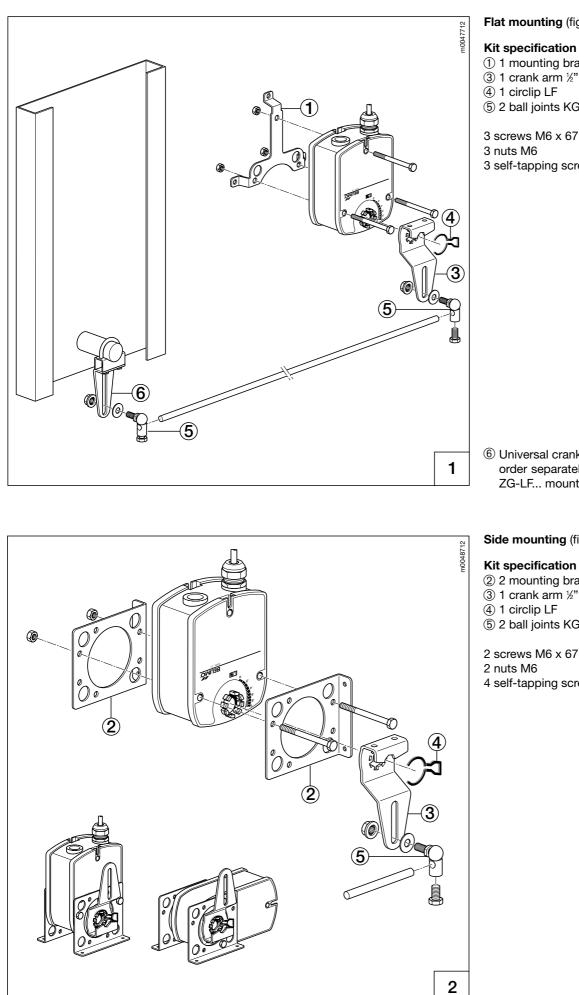

# Instructions for direct mounting

Flat mounting (fig. 1)

- Kit specification ZG-LF1
- ① 1 mounting bracket LF

- (5) 2 ball joints KG8

3 screws M6 x 67 3 self-tapping screws 4.2 x 13

6 Universal crank arm: order separately, not included with the ZG-LF... mounting accessory.

Side mounting (fig. 2)

## Kit specification ZG-LF3

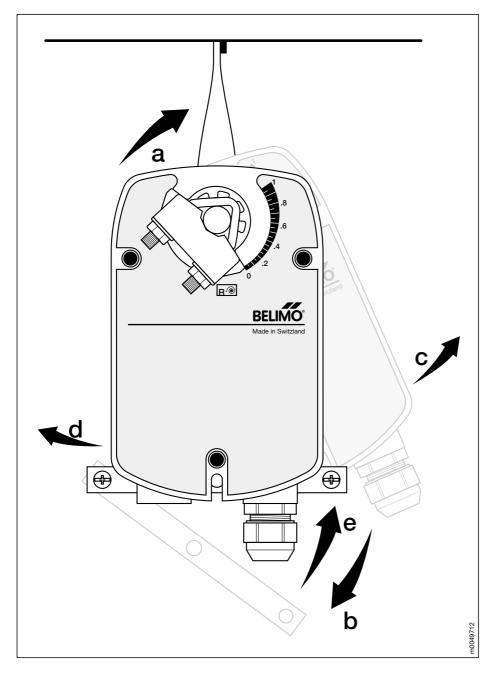

- 2 2 mounting brackets LF

- (5) 2 ball joints KG8

2 screws M6 x 67

4 self-tapping screws 4.2 x 13

## Installation steps as example

- 1. Move damper blades to the fail-safe position (a) and determine the orientation of the universal clamp.
- 2. Engage the actuator on the shaft as close as possible to the determined orientation. Fix the screws lightly on the V-bracket by hand. In the example the spring return has to go clockwise (cw). Therefore the actuator has to be visible with the mounting side **R**.
- **3.** Mount the universal mounting bracket in the right position (do not tighten the screws).
- **4.** Remove the screw at one end of the mounting bracket and pivot it away from the actuator (b).
- Loosen the universal clamp and, making sure not to move the damper shaft, rotate the actuator approximatively 5° in the direction which would open the damper (c).
- 6. Tighten the universal clamp to the shaft (10 mm wrench).
- Rotate the actuator "damper closed" to apply pressure to the damper seals (d).
- 8. Rotate the mounting bracket in the definitive position (e) and tighten all fasteners.
